## Leading Nebraska's Electric Vehicle Charge with Incentive Programs

# GOEV

DRIVE ELECTRIC. LIVE ELECTRIC.

powered by **ENERGYWISE<sup>SM</sup>**  
Use less. Spend less. Do more.

The upfront cost of electric vehicles (EVs) is considered one main obstacle to potential consumers. NPPD, in partnership with wholesale utility customers, has new incentives available. These incentives reduce the purchase price of an EV and related infrastructure, including pre-wiring, conduit, and charging stations.

#### Electric Vehicle: \$4,000

- \$4,000 incentive for the purchase of a new battery electric vehicle.
- Deadline is December 31, 2022. Customers must have a completed registration to be eligible.

#### Charging station: \$500

- \$500 incentive for the installation of a residential vehicle charging station.
- ChargePoint, WI-FI enabled station.
- Internet wireless connectivity.

#### Pre-wiring incentive: \$400

- \$400 incentive for new construction for in home pre-wiring for the future installation of an electric vehicle charging station.
- 100% of costs (maximum of \$600) incentive for existing structure for in home pre-wiring for the future installation of an electric vehicle charging station.

#### Commercial Charger Conduit Incentive: \$1,000

- 100% reimbursement incentive (maximum of \$1000) for new commercial construction for the installation of conduit to be used for the future installation of an electric vehicle public charging station.

#### Commercial Charger Incentive: 50% (90% for Non-Profit)

- 50% reimbursement for the equipment and installation of that equipment necessary for a public or workplace electric vehicle charging station.
- Eligible grants, discounts, etc., are deducted from the total cost to determine customer's cost. This amount is eligible for the cost share.
- The reimbursement incentive is based on the lower of two qualified bids being submitted to the utility.

#### EV Promotional Events: 100% up to \$2,000

- 100% reimbursement of event expenses (up to \$2,000) associated with an electric vehicle event.
- Primary focus of the event is the promotion of electric vehicles (i.e. ride and drive events, dealership promotion of new electric vehicle models, home shows, etc.).

## Follow these easy steps

- Visit with your electrical utility to discuss your EV and charging needs, ensure incentives are still available, and pick up an application form.
- All programs require a reservation request prior to purchase and/or installation.
- Incentives have a limited time for purchase and/or install, which can expire.
- Once approved, there will be a time period to provide proof of purchase or installation.
- Submit payment request after purchase and installation.
- Incentives are limited so check with your local electric utility for availability.

Incentives valid as of 7-1-2022. Subject to change without notice. Verify incentive amounts and program information at [EnergyWiseNebraska.com](http://EnergyWiseNebraska.com). Sponsored by Nebraska Public Power District in partnership with its Wholesale Utility Customers.
